The Supercard DSTWO is a NEW generation flash cart. In development for more than one year, the Supercard team have worked hard to bring you the worlds first flash cart with a built in CPU.

With all the great features of the original Supercard DSONE; the DSTWO delivers even more amazing functions that take full advantage of the onboard CPU.

DSTWO's powerful onboard CPU allows for built-in support of Game Boy Advance (GBA) and Super Nintendo Entertainment System (SNES) games and other amazing realtime features that are available during gameplay. It begins with the DSTWO... Now it's time to go beyond DS!

Fast Start up:

Step 1: Download the OS from www.supercard.sc.

Step 2: Unzip and copy the system folder _dstwo to the root of microSD.

Step 3: Copy the game files to the microSD, insert the microSD into DSTWO.

Hotkey: L+R+ START   (default)

💡 FAQ

Q: Why does the message "no find English/Chinese/Japanese ver.!" appear?
A: This message appears when the system files are not the correct English/Chinese/Japanese version. Please download the English/Chinese/Japanese version from: http://eng.supercard.cn http://www.supercard.sc http://jp.supercard.cn

Q: What formats does the RealTime game guide support?
A: The RealTime game guide supports TXT and BMP formats (the BMP files should be in BMP24 format).

Q: How do I play GBA games on the DSTWO?
A: Please refer to the web manual at: http://eng.supercard.sc/manual/dstwo/emu.htm

Q: I want to share my games with my family and friends. Does the DSTWO provide multiple save slots?
A: Yes! The DSTWO supports multiple RealTime save slots.

Q: What does the DSTWO's slow motion function do?
A: Slow motion slows the game speed right down to enable you to overcome difficult gaming challenges.

Q: What file formats does the DSTWO's eBook and picture viewing functions support?
A: eBook supports both TXT and PDF format. The picture viewer supports BMP, JPEG, JPG, PNG, TIF and GIF formats.

Main feature

File Operation Function
You can be open the file browser to cut, copy, paste, delete files as you like, so that you can do some simple file operations without computer.

New exclusive feature "iDS Anti-Paricy"
Utilizing the CPU, DSTWO can emulate orginal cartidgecan, pass through and bypass any anti-piracy measures which is the first cart to do so. Most of the games will never need to be patched to run.

New exclusive feature "Free Cheat"
This new exclusive feature during game play will allow you to search for and enable various cheats and hacks, such as modifying or even locking your characters health or enabling/restocking power-ups.

Real-Time-Save power up!
It increased RTS slots up to 4 individual slots. Additional, added the 3D data intelligent detection function, to improve the compatibility of 3D games so that it can be more stable. Moreover, also fast read & write speed as always.
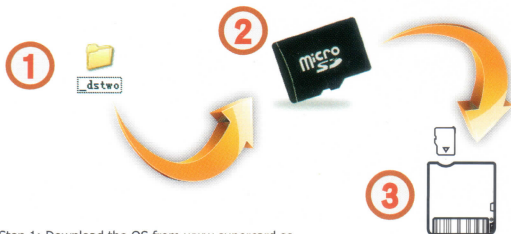

Hardware supports slow motion
Changed the slow motion function from Cheat code method to hardware method. Better stability and compatibility.

Evolution of Real-Time-Game-Guide
With the beautiful and small font so that could display more on the screen. Supports picture guide, then you won't lose your way in a deep maze. In addition, supports for direct reading .Txt text file, more convenient to use.
